Southeast Health District

“Keeping Communities Safe and Healthy”

County Health Department Services

Your County Health Department

County Health Departments have served our local communities in Georgia for more than 100 years.

The mission of the Southeast Health District and your local Health Department is to protect and promote the health of people in Southeast Georgia, wherever they live, work and play, uniting with individuals, families and diverse communities to improve and enhance their quality of life. Your health is important to us. Our staff is well trained to provide services to this community. You can depend on us to protect Georgia's health.

Each Health Department provides various programs and clinic services. Check with your local Health Department for more information.

CHILD and ADOLESCENT HEALTH

Babies Can't Wait (BCW): An early intervention program for infants and toddlers with developmental delays.

Breastfeeding: Assists families with successful breastfeeding experiences, including education, promotion, referral and breast pump loans.

Children 1st: Health assessments for children aimed at improving the health and developmental outcomes of children 0 to 4 years old.

Children's Medical Services (CMS): Offers long-term specialty treatment and therapy for children with orthopedic, seizure, hearing, cardiac, chronic lung, genetic, vision and sickle cell disorders.

Health Checks: Early, Periodic, Screening, Diagnosis and Treatment for children 0 to 21 years old.

Immunizations (shots): Hib; Hepatitis A; Hepatitis B; polio; influenza (flu); diphtheria; tetanus and whooping cough (DTP); measles, mumps and rubella (MMR); varicella and pneumococcal vaccines are available at all Health Department sites.

Immunizations for international travelers are also available at the Ware County Health Department in Waycross.

Intestinal Parasites, Scabies, Lice: Exam and treatment.

Lead screening: Identifies children with lead poisoning.

School screenings: Vision, hearing, dental and scoliosis.

Sickle Cell: Testing and counseling for Sickle Cell Disease.

Teen services: Youth services are provided in all of the county health departments.

Women, Infants and Children (WIC): Supplemental food, physical assessment and nutritional counseling.

WOMEN'S HEALTH

Cancer Screenings: Breast, cervical (BreasTEST and More Program) and colon (hemocults).

Family Planning: Education, examination, pregnancy testing, counseling, treatment and birth control methods.

Perinatal Health Partners and Best Babies (PHP and BB): Nursing case management of high-risk pregnant women and their newborns.

ADULT HEALTH

Health Promotion: Promotes policy and environmental changes to support healthy lifestyles within communities, schools and worksites.

Stroke and Heart Attack Prevention Program (SHAPP): Screening, treatment and joint management of high blood pressure with local physicians.

Immunizations (shots): Influenza (flu), Tetanus/diphtheria, Hepatitis A, Hepatitis B, meningococcal, pneumococcal and international immunizations.

Nutrition: Education and counseling.

INFECTIOUS DISEASES

Epidemiological Investigation: Meningitis, foodborne and other illnesses.

HIV/AIDS: Testing, counseling and education, outpatient services and social services.

Sexually Transmitted Infections (STIs): Testing, followup and treatment.

Tuberculosis (TB): Diagnosis, treatment and prevention, including case finding and contact followup.

ENVIRONMENTAL HEALTH

Complaint Investigations: Investigates and responds to complaints of potential health hazards.

Disease Control: Foodborne, vectorborne and waterborne illnesses; and rabies.

Injury Prevention: Educational modules, literature and consultations.

Pollution Control: Inspecting water (includes well water program), land and septic tank systems.

Sanitation Control: Inspecting motels, restaurants, institutions, tattoo and body piercing studios and public swimming pools.
